

GBT Observing for July 2002

Legend

The time is local sidereal time. The dates are eastern time zone dates and the number on the far right is the local sidereal date. The dark vertically slanted line marks midnight eastern time and the light vertically slanted line marks 8am eastern time.

The ~ mark indicates that the telescope has not yet been scheduled. The SU or Setup code refers to system preparation for start of Astronomical observing.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

07/29/2002

The sidereal time at midnight on the first is 17h21m.

Codes

Notes

Ca - HI Galaxy survey
Cd - HI Galaxy Survey
Cf - Pulsar Drift scan survey - Ghigo
Cb - Pulsar drift observations - Stairs
Tb - Tests of M&C software
Td - Tests of M&C v3.5 software - Radziwill
Tf - Install M&C v3.5 Software
Tj - Tests of GBT01A-061 - Langston
Tg - Tests - L band calibration - Maddalena
Th - Tests of Observing scripts - Ghigo
Ta - Tests of GBT02A-008 Hogg
Tc - Tests of GBT02A-041 - Balser
