

# GBT Observing for January 2004

## Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

02/01/2004

The eastern time at midnight local sidereal time on the first of the month is 17h40m.

### Codes

### Notes

Ad - 3A15\*4 Lane et al  
Ae - 3B26\*8 Roberts et al  
Tj - RCO\*4 - Ghigo  
Tc - Q band fringe chk - Ghigo  
Ta - M&C tests - Radziwill  
To - BL tests - Norrod  
Tb - PCO 2A35 - Ghigo  
Tg - PCO 3C2 - Ghigo  
Tn - PCO\*4 3C1 - Ghigo  
Td - PCO 2A66 - O'Neil  
Ti - New M&C Vers - Radziwill  
Tk - Spigot - O'Neil  
Tm - BCO CPSR2 tests - O'Neil/Jacoby  
Tf - Baselines - Norrod  
Tp - CGSR2 tests - Jacoby  
Th - RFI tests - Fisher  
Tl - PTCS tests - Prestage
