

GBT Observing for February 2004

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

02/29/2004

The eastern time at midnight local sidereal time on the first of the month is 15h39m.

Codes

Notes

Ac - 3A15*3 Lane et al
Ab - 4A45*8 Roberts et al
Cb - Q band comm - Norrod
Ce - Q band comm - Ghigo
Mb - Install 450Mhz Feed
Th - PCO 3C26 - Langston
Ti - M&C Integ tests - Fleming
Tj - PCO 3C2 - Ghigo
Tk - Holography - Maddalena/Prestage/Balser
Tf - RCO*3 - Minter
Tc - MC Integ - Fleming
Tl - Tests - Langston
To - RCO Q band - Norrod
Tb - RFI Tests Fisher
Tp - Software Tests - Prestage
Ta - PCO 2A41 - Balser/Rood
Tn - Spigot tests - O'Neil
Td - RCO*4 450MHz - Langston
