

## GBT Observing for March 2004

### Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sideral date at the start of the day. The dark vertically slanted line marks midnight local sideral time and the light vertically slanted lines mark 6,12, and 18 hours local sideral time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

03/26/2004

The eastern time at midnight local sideral time on the first of the month is 13h44m.

#### Codes

#### Notes

Cb - Q band comm - Maddalena  
Cf - Q band comm - Langston  
Mb - Install 450Mhz Feed  
Da - Power Shutdown  
Td - RCO\*4 450MHz - Langston  
Tl - Spigot tests - Lacasse/O'Neil  
Tb - PCO 2C17 - Balser  
Tm - VLBI tests - Ghigo  
Tk - RCO\*8 - Ghigo  
Ti - AB Tests - Watts  
Tg - M&C Integ - Fleming  
To - PCO 4A5 - Braatz  
Tj - Tests - Ghigo  
Tp - API Tests - Ghigo  
Tq - PCO 2A21 - Balser  
Ta - M&C Reg tests - Braatz  
Tf - +M&C Release - Fleming
