

GBT Observing for October 2004

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sideral date at the start of the day. The dark vertically slanted line marks midnight local sideral time and the light vertically slanted lines mark 6,12, and 18 hours local sideral time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

10/22/2004

The eastern time at midnight local sideral time on the first of the month is 00h39m.

Codes

Notes

Ab - 4A45*8 Roberts et al
Ae - 4B40 Stil et al
Ad - 4C45*3 Stairs et al
Af - 4A3*3 Curran et al
Aa - GR024*3 Ramachandran et al
Td - M&C Install - Fleming
Tc - Software tests - Ghigo
Ta - API tests - Ghigo
Tb - RCO*3 340MHz
Tf - RCO*8 800 MHz
