

# GBT Observing for November 2005

## Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

11/11/2005

The eastern time at midnight local sidereal time on the first of the month is 21h37m.

### Codes

### Notes

Ac - 5C49 Stinebring et al  
Aa - GL028 Lonsdale et al  
Ai - 5C34 Kameno et al  
Ae - +5C43 Kanekar et al  
Ad - 5C23\*8 Camilo et al  
Md - Install C band  
Mb - Install 800 MHz  
Mc - Shutdn  
No - +Notscheduled  
To - PCO 5C31 - Minter  
Tl - RCO\*6 600MHz  
Th - VLBI tests - Ghigo  
Tf - PCO 5C31 - Kepley  
Ta - RCO\*3 350MHz  
Tc - RCO\*8 800 MHz  
Tj - +Poln Tests - Robishaw  
Ti - Script tests - Robishaw
