

# GBT Observing for December 2005

## Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6, 12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

12/16/2005

The eastern time at midnight local sidereal time on the first of the month is 19h38m.

### Codes

### Notes

Ab - 5C34 Kamen et al  
Ao - 3C12 Braatz and Henkel  
Aj - 5C45\*3 Ransom et al  
Al - 4C43\*3 Ransom et al  
Ah - 5C57\*3 Jorgenson et al  
Ai - 5C23\*8 Camilo et al  
An - 6A8 Minter  
Ad - 5B32 Thorsett et al  
Mb - Install 340 MHz  
Tc - Astrid tests - Clark  
Ta - RCO\*3 340 MHz  
Td - RCO 800  
Tf - RCO C band  
Tb - +Poln tests Mason
