

## GBT Observing for February 2006

### Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

01/26/2006

The eastern time at midnight local sidereal time on the first of the month is 15h36m.

#### Codes

#### Notes

Ah - +1A5 Turner & Langston  
Ak - 6A66 Nidever et al  
Ao - 4C43\*8 Ransom et al  
Af - 5C23\*8 Camilo et al  
Aa - 6A43 Morgan et al  
Aj - 6A46 Langston and Turner  
An - 6A28 Hewitt and Yusef-Zadeh  
Ag - 5B32 Thorsett et al  
No - +Notscheduled  
Tb - Astrid Tests - O'Neil
