

GBT Observing for April 2006

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts. Holidays are indicated by non white background for sid day #.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

04/07/2006

The eastern time at midnight local sidereal time on the first of the month is 11h44m.

Codes	Notes
Aa - 6A46	Langston and Turner
Ab - 5C23*8	Camilo et al
Ah - +6A18	McMullin and Balser
Ak - +5C65	Braatz et al
Ae - +6A50	Begin et al
Ai - +4C43*8	Ransom et al
Am - +6A32	Braatz et al
Ag - +6A22	Braatz et al
Af - 6A26*6	Kanekar
Ac - 5B32	Thorsett et al
No - +Notscheduled	
Tf - Spigot tests -	Ransom
Tc - L band tests -	Ghigo
Td - L band tests -	Maddalena
Ta - RCO*6	600
Tb - RCO*8	800
