

## GBT Observing for February 2007

### Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts. Holidays are indicated by non white background for sid day #.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

03/20/2007

The eastern time at midnight local sidereal time on the first of the month is 15h38m.

#### Codes

#### Notes

Aa - 7A98 Camilo et al  
Ai - 7A15 Mangum et al  
Ad - 6B33\*8 Hessels et al  
Ab - 6C52 Ransom et al  
Ag - 7A80\*3 McLaughlin et al  
An - 6C52 Ransom et al  
Mb - Install 340 MHz  
Mc - Install 800 MHz  
Tf - Tests of BB241  
Ta - PCO - Kanekar  
Tc - Ka band tests - Maddalena  
Tb - RCO\*3 340 MHz  
Td - RCO\*8 800MHz
