

GBT Observing for April 2008

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts. Holidays are indicated by non white background for sid day #.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

04/03/2008

The eastern time at midnight local sidereal time on the first of the month is 12h42m.

Codes	Notes
--------------	--------------

Ad - 8A11*8	McLaughlin et al
Af - 8A77	Camilo et al
Aa - 8A20*8	Hessels et al
Al - +5A29	Vanden Bout et al
Ac - 7C60*8	Camilo et al
Ag - 8A41	Darling and Zeiger
Ae - 7C33*8	Hessels et al
Aj - 8A47	Carilli et al
No - +Notscheduled	
Tm - RCO	U & C
Ta - Servo tests	- Weadon
Tb - Servo tests	- Waedon
Tf - +HOLO	- Hunter
Td - RCO	450MHz
