

GBT Observing for June 2009

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts. Holidays are indicated by non white background for sid day #.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

06/04/2009

The eastern time at midnight local sidereal time on the first of the month is 08h42m.

Codes	Notes
--------------	--------------

Aa - GLST011217	Tomsick et al
Am - 9B5*A	Stocke et al
Al - 9B30	Cannon et al
Ae - 9B48	Margot et al
Ap - 9B34	Chynoweth et al
Ab - 8C14	Camilo et al
Ao - 9B43	DeCesar et al
Ac - 8C23	Camilo et al
Aq - 9A2	Anderson et al
Ai - 9B28*8	McLaughlin et al
Aj - 9B6	Camilo et al
Ta - RCO	U
Tf - Tests	RRI
Tb - RCO*	A
Td - RCO*	3
Tg - RCO	S
Tc - Tests	Q HP
