

GBT Observing for February 2010

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sidereal date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6,12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program CheckOuts which are feasibility tests of approved proposals. RCO refers to receiver checkouts. Holidays are indicated by non white background for sid day #.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

03/23/2010

The eastern time at midnight local sidereal time on the first of the month is 15h36m.

Codes

Notes

Am - 10A16 Jackson and Hunter
Aa - 10A9 Mangum et al
Ab - 9C92 Zeiger and Darling
Ao - 9B61*8 Heatherly and Rosen
Ad - 10A46*3 Agueros et al
Ae - 10A23 Lorimer et al
Ap - BB240 Bower et al
Ac - 9C57*3 Ransom et al
Ag - GLST021284*8 Camilo et al
Ah - 10A50 Walker et al
Ak - 10A28 Crawford et al
Aq - 9C13 Nordhaus et al
