

# GBT Observing for April 2002

## Legend

The time is local sidereal time. The dates are eastern time zone dates and the number on the far right is the local sidereal date. The dark vertically slanted line marks midnight eastern time and the light vertically slanted line marks 8am eastern time.

The ~ mark indicates that the telescope has not yet been scheduled. The SU or Setup code refers to system preparation for start of Astronomical observing.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by \* and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

The sidereal time at midnight on the first is 12h22m.

04/16/2002

### Codes

\*z - 1A40 Lockman

### Notes

Projects that may get bumped due to good K Band weather

=====

Commissioning from 4/11-4/30

GBT01A-040 on 4/27 - 4/28
