Abstract

This is an example document demonstrating how to create PTCS System Notes using LaTeX. Companion example documents are available for creating System Notes using MS WORD, as well as for creating Project Notes in either formats.

1 How to use this document

This document is a template for producing a PTCS System Note using LaTeX. To use it, proceed as follows:

- Copy this document:

`/home/groups/ptcs/docs/templates/ptcssn.tex`

from Unix, or

`\\samba-gb\ptcs\docs\templates\ptcssn.tex`

from Windows to your working directory, and rename it `ptcssnN.tex` (e.g. `ptcssn7.tex`) where `'N'` is the next PTCS System Note number (contact Richard Prestage to get a number).

- Make sure you have a copy of `ptcssn.sty` in your current directory, or the standard LaTeX directory. This is also available from the same directory as the `.tex` file.
- Edit the document as appropriate, by modifying the sections indicated as follows:

```

%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
% Change the following definitions as appropriate.
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%

```

- Replacing this and the next section with your actual text!
- When the document is in final draft form, contact Sue Shears for a GBT Archive number, and add this and the keywords to the document.
- Email or otherwise transfer the document back to Richard Prestage for inclusion in the documentation directory (I'm in the process of getting Chris Clark to make this more transparent).

2 To Update a System Note

- Make sure you are working with the latest copy.
- increment the version number by 1.
- change the date appropriately.
- Update the history section with a brief summary of the changes.
- Send the document back to Richard again.
