

The Second NAIC/NRAO School on Single Dish Radio Astronomy

NRAO & NAIC are organizing the second summer workshop on single dish radio astronomy. The goal is to familiarize participants with current techniques and capabilities in single-dish radio astronomy through an intensive series of lectures from world-class experts and hands-on observing projects with the GBT & Arecibo telescope.

- When: 10 – 16 August 2003
- Where: Green Bank Observatory, Green Bank WV
- Who: Graduate students, postdocs, and interested scientists from other fields.

Attendance is limited to 55 participants. Further details available at:
