Legend
The time is local siderial time. The dates are eastern time zone dates and the number on the far right is the local sideral date. The dark vertically slanted line marks midnight eastern time and the light vertically slanted line marks 8am eastern time.
The ~ mark indicates that the telescope has not yet been scheduled. The SU or Setup code refers to system preparation for start of Astronomical observing.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

The siderial time at midnight on the first is 21h25m.

Codes | Notes
--- | ---
Ab - 2A62 Camilo et al | 
Ca - Checks on GBT02A-021 - Balser | 
Tx - Tests of LO blanking in Spectrometer - Ghigo | 
Tc - Tests of Spectrometer modes - Hogg | 
Td - Tests of Spectrometer modes - Hogg | 
Ta - Tests Low Freq - Roshi | 
Tg - Tests of Spectrometer modes - Hogg | 
Tb - Tests of Spigot card - Kaplan | 

08/29/2002
