GBT Observing for May 2004

Legend

The time is local eastern time. The dates are eastern time zone dates and the number on the far right is the local sideral date at the start of the day. The dark vertically slanted line marks midnight local sidereal time and the light vertically slanted lines mark 6, 12, and 18 hours local sidereal time.

The ~ mark indicates that the telescope has not yet been scheduled. The Se or Setup code refers to system preparation for start of Astronomical observing. PCO refers to Program Checkouts which are feasibility tests of approved proposals. RCO refers to receiver checkouts.

GBT proposal codes on the graphics schedule have been shortened to their minimum unique length. For example a code of 1A7 is GBT01A-007 while 2B45 would be GBT02B-045. The first number in the shortened code is the year after 2000, the letter represents the trimester (A, B or C) and the last number is a number between 1 and 999. Proposal codes followed by * and one of 3,5,6,8,A indicates if a prime focus receiver is to be used and the particular one to be used.

The eastern time at midnight local sidereal time on the first of the month is 10h43m.

Codes | Notes
--- | ---
Ac - 3B11 Widicus et al | |
Th - RCO PF2 - tbd | |
Ta - RCO Ka band - Mason | |
Tb - M& C Integ - Fleming | |
Tc - Spigot tests - O’Neill | |
Tj - RCO 800MHz - tbd | |
Tg - PCO 4A46 - Ghigo | |
Tk - RCO Q band - Jewell/Minter | |
Tl - API tests - Ghigo | |
Tr - +PTCS Tests | |
