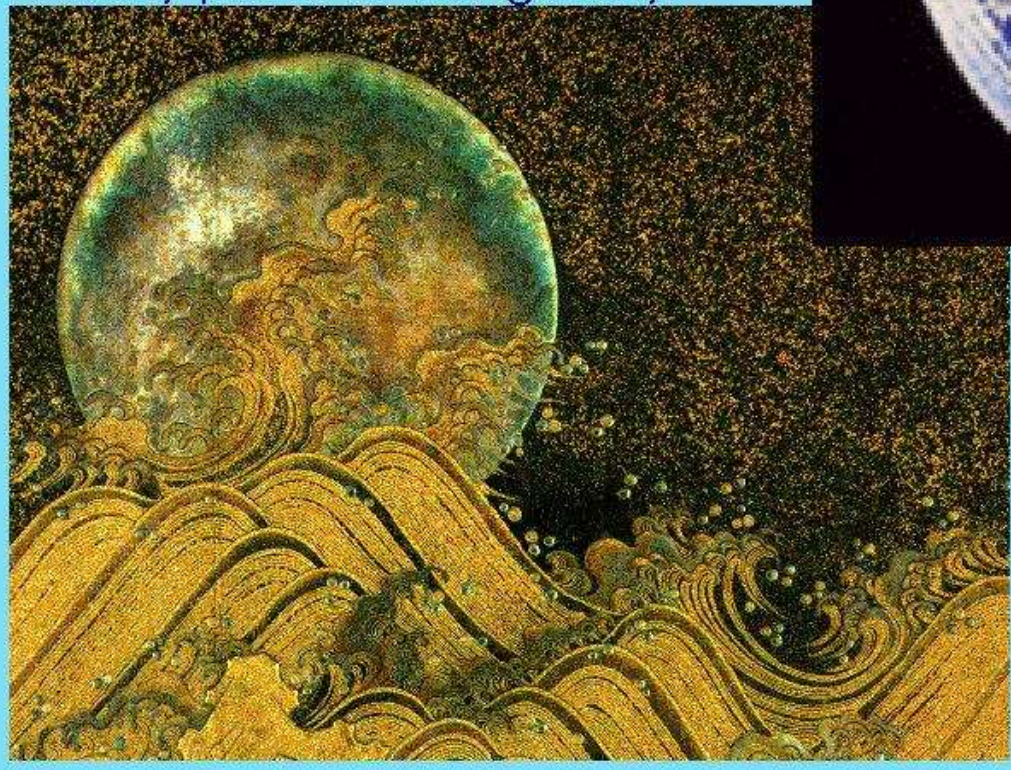
Earth: The Water Planet

75% of the Earth is covered with water. Recently water ice has been found on the moon. NRAOs Radio Telescopes have founds clouds of gas with water in many parts of our galaxy.



In the NRAO scale model solar system, 1 foot = 3,000,000 feet and the Earth is the size of a pea! The Earth is 50 meters from the sun and you can walk faster than light travels!
