

NOTE - this schematic based on my experiences of rebuilding battery packs and not on any factory information. Use at your own risk!!!

* - BT1 cells used depend on the model.
 NiCadLady can supply pre-made packs of cells with more capacity than the original factory cells.
 For the CS15, they supply a pack rated at 9.6V, 650 mAH.
 For the CS18, they supply can a pack rated at 9.6V, 1400 mAH or 1700 mAH.
