# FAST-X

Two servers can control the telescope.  
Each have XFCE options which claims to be faster.

1. Ariel
2. Titania

Several servers can be used for data reduction.

<https://www.gb.nrao.edu/pubcomputing/public.shtml>

1. Euclid
2. Fourier
3. Newton
4. Planck
5. Thales

Don't forget to scroll down and hit launch.
